# Rock your Day

A close-up portrait of an older man with a grey beard and mustache, wearing a black wetsuit. He is smiling slightly and looking towards the camera. The background is a bright yellow, and the overall image has a high-contrast, slightly grainy aesthetic. The text 'Rock your Day' is overlaid on the right side of the image.

Welcome  
bultaquista

**First of all thanks for buying a Bultaco.** We are proud of having your confidence. **The new Brinco is a new and groundbreaking concept, the Moto- Bike,** that you will enjoy as never before dreamed.

For Bultaco, innovation is not only to reach new technological goals, but also to offer new experiences. And Brinco is something completely new, ground-breaking, it is the result of the will to transfer the Bultaco spirit to a new era, with a new language, but always true to the classic brand values: passion, innovation, competition.

**With Brinco, Bultaco proposes a whole new way to understand and live the two wheels.** A combination striking between the worlds of motorcycle and bicycle: electric propulsion and physical experience of pedaling, independently, or combining the two systems. You decide at every moment how to maximize the perfect symbiosis between grip and pedal.

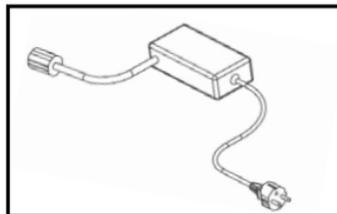

The following information contains the main highlights on how to enjoy your Brinco. We also recommend to carefully read the User's Manual which you can easily find at **[www.bultacobrinco.com](http://www.bultacobrinco.com)**

Bultaco Team

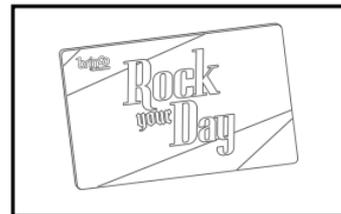

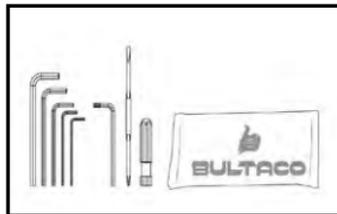

The Welcome Kit of your new Brinco contains the items listed below:

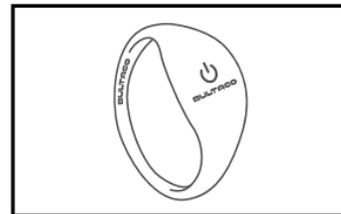

Bultaco Battery  
Charger

2 Key Cards  
- Security Master  
(marked with a yellow sticker)  
- "Slave" Copy for daily use

Bultaco Tools kits (includes  
keys to disassemble battery  
and rear wheel)

Brinco  
Wristband Key

Seat height

Three phase permanent magnet motor

Front suspension adjustment

Battery safety lock

Battery connector

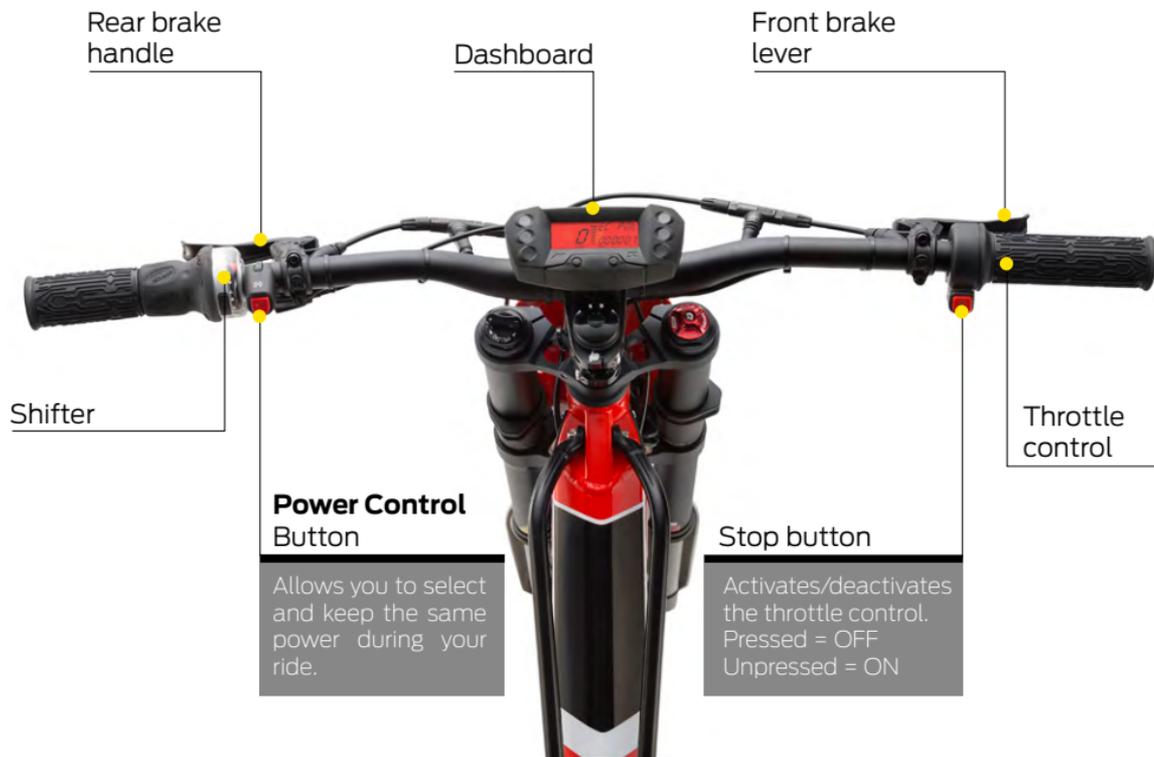

Power Cell Li-Ion Matrix Battery

DC/AC Three phase controller

**Overdrive**

Implement Overdrive - Low Range Gearbox by pressing the button located at the base of the crank, push the right hand side for higher speed use.

Rear brake handle

Dashboard

Front brake lever

Shifter

Throttle control

**Power Control Button**

Allows you to select and keep the same power during your ride.

**Stop button**

Activates/deactivates the throttle control.  
Pressed = OFF  
Unpressed = ON

**WARNING**

IDENTIFY CORRECTLY BRAKES POSITIONING. The front brake lever is on the right. The rear brake lever is on the left handlebar grip.

Always make sure, before switching ON your Brinco, that the accelerator returns correctly to its position when you release it after accelerating.

While using the **POWER CONTROL** button please increase caution.

ALWAYS check that the vehicle is turned off after every use. Stop

## WARNING

WARNING INDICATOR.

**Flashing light:** keep driving and enjoying your Brinco. The self-protection system will regulate the power delivery to decrease your Brinco's level of demand.

**Steady light:** vehicle will stop. Check the user's Manual for the full list of warning signs.

To improve battery life as much as possible and optimize its performance, recharge it after every use.

At the Driving Mode's right side you will find the instant power value in W.

Whenever the dashboard is illuminated your Brinco will be on, but it only will be in running condition when stop button is ON.

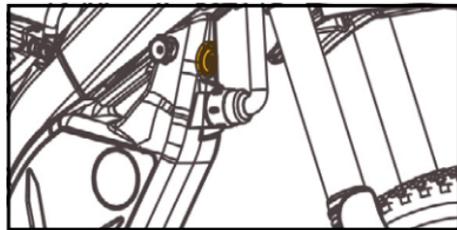

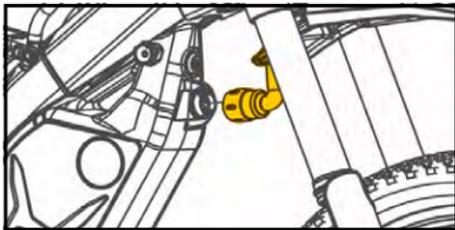

Before riding your Brinco, ensure everything works properly

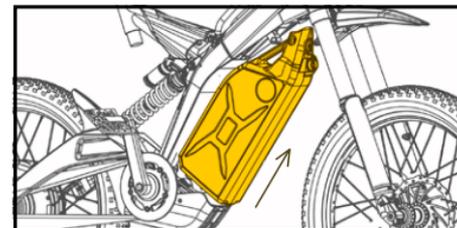

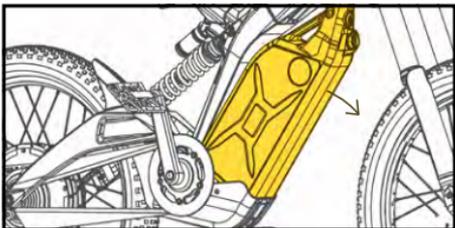

- 1. Seat:** adjust the height to your size
- 2. Handlebar:** adjust the height to your size
- 3. Mechanical Components:** make sure that all items are correctly set.
- 4. Brakes:** adjust the position of the handles, check its operation and familiarise with the brake levers.
- 5. Suspension:** set both front and rear as you prefer.
- 6. Tires:** check condition and pressure. [Recommended pressure: 1.8-2.2 BAR]
- 7. Throttle lever:** handle it carefully and release to check that it correctly returns to its initial position (make sure to do it with the stop button in OFF position).
- 8. Battery:** charge it for maximum performance. Do not forget that when the battery indicator on the dashboard displays only two lines, you can use only the ride map eco and tour.

## Battery: Removal, charging and reassembling

- 1. Unplug the power cord** from the battery by hand turning the connector housing a quarter turn counterclockwise and pulling it carefully.
- 2. Enter the key** provided by Bultaco to unlock the battery safety lock. **Remove the battery retaining screw.**

- 3. Hold the battery firmly**, rotate it slightly on its base to release the anchoring with the chassis.
- 4. Once the battery is disconnected** from the lower support, raise the battery to fully remove it. You can now connect it to the charger.

### WARNING

To reassemble your battery, follow the steps described in reverse order.

**If you want to charge your battery without removing it** you must follow only step 1 and directly connect it to the charger turning it counterclockwise.

The following charger indicators will inform you about battery charge state:

The battery is charging.

The battery is fully charged.

Failure during charging. Check charger indications.

**Before removing the battery make sure your Brinco is always disconnected.** The battery may be damaged if fully discharged.

While charging, place the battery **horizontally** in a safe position and close to the socket.

When you plug the male connector to the battery, either the moto-bike's or the charger's, be careful not to damage it.

## Start riding your Moto- Bike in 5 simple steps

First of all make sure that the stop button is in OFF position (pressed).

1. Put your key card on the rear side of the dashboard (warning light will be activated).
2. Pull one of the two brake levers.
3. Select your riding map (ECO / TOUR / SPORT). To change it, make a short press on **“MODE”** button.
4. Position the stop button in **ON** (button not pressed).
5. Throttle and **Rock Your Brinco!**

### WARNING

Always ride responsibly.  
**Always wear a helmet, gloves and use proper equipment for your ride.**

**Never carry passengers.**  
Do not use the Moto-Bike to tow or to transport luggage. Maintain properly the Moto-Bike to avoid damage and any technical failure.

The Moto-Bike is for off road use and **not suitable for use on the public road.**

## Get the very most out of the Bultaco Brinco

### Enjoy the perfect ride

Even if pedaling and engine are separate systems, combine them to enjoy the best experience.

### Ride like you like best

You have three different ride modes: Sport, Tour and Eco. Play with them to enjoy any situation.

The self-protection Brinco system will modulate the power delivery accordingly to the motor needs.

### Control the power anytime

The Power Control maintains constant power and always delivers the same thrust. Leave the throttle and enjoy the best comfort of riding.

### Pedal comfortable at any speed

Choose the best gear ratio activating the Overdrive with a simple foot movement.

How fast you go and far you get will depend on combining your own pulse with your Brinco's electrical heart.
